CONNECT + EDUCATE + LEVERAGE

**MARYLAND
TECH COUNCIL**

Imagine an industry association in Maryland where the staff works every day to ensure your company reaches its full potential as a vital member of the technology and life science communities. A collaborative environment where you can connect to your peers both in person and online to share information, give advice, and inspire one another. A relationship with people who care about what you have to say and give you a voice so that they can advocate for you full-time in Annapolis. Educational events that focus on topics you and your employees need in order to accelerate your professional growth. And, a place that understands what it takes to build and grow a company and offers you an expansive cost savings program that saves you time and money. It's all here at the Maryland Tech Council. This is your community.

The Maryland Tech council is the largest technology trade association in Maryland. Our mission is to build stronger technology and life science communities in Maryland by nurturing a healthy and vibrant environment where members can connect and prosper.

WE SPEAK YOUR LANGUAGE

Finding an industry organization where you not only fit in, but also receive the support you need can be challenging. Too big, too cliquish, and a lack of personalized programs are obstacles that everyone encounters. The Maryland Tech Council tailors your membership to the information and programs that best suit your professional interests and style. We let you choose among many industry sector communities where you can make professional contacts, attend educational events or connect online. Are you a cloud computing or cyber security professional? Do you work in vaccine development or genetics? We have a community for that. Our staff and Board members actively support Maryland Tech Council communities and provide them with the tools they need in order to thrive.

POLICY

The Maryland Tech Council is the largest technology council in Maryland. That means we work year-round advocating for the interests of technology and the life sciences on behalf of our members. Addressing threats and opportunities on the local, state, and federal levels is one of the most critical factors that affects the success or failure of highly competitive technology and life sciences companies. The Government Relations Committee advises and directs the Maryland Tech Council's advocacy efforts. Membership on the committee is available to any member who wishes to play a direct role in the Tech Council's advocacy efforts.

CONNECTING

Meeting new peers, expanding your professional circle, and sharing ideas are all critical to improved business practices and higher profits. When given the right tools, keeping in touch and sharing information should be effortless. The Maryland Tech Council has committees, roundtables, and programs that allow you to meet people in the industries of your choice. We have groups that target C-level executives, members under 40, and leaders in industry sectors such as health IT, genetics, big data, medical device and more. Our flexible environment gives you the keys to where, when and with whom you want to make a professional connection.

SMARTBRIEF NEWSLETTER

The Maryland Tech Council's bi-monthly e-newsletter will provide you with a quick, two-minute read that will help keep you up-to-date on the latest technology and life science news in the community. As a member, you will automatically receive a subscription to the *MTC Smartbrief*, one of the many valuable resources available to you.

WEBSITE

The Maryland Tech Council website is your one-stop resource for everything you need to know about the organization. You can update your company's information, connect to our social media sites, read about member news, check on the progress of policy matters, read about and register for events and so much more. Think of the website as your knowledge navigator to all things Maryland Tech Council.

MEMBER DIRECTORY

Not only a prospecting tool. Make new connections or follow up with friends using the searchable online directory. Each member is listed along with their contact information including contact name, address, phone number, website, and social media sites. The directory is updated monthly so that new members enjoy quick exposure and listings are always current.

MENTOR (MTC VMS)

The Maryland Tech Council Venture Mentor Service Program (MTC VMS) is based on team mentoring approach modeled after the highly-successful MIT Venture Mentoring Services. The ultimate goal of the program is to bring employment opportunities and capital to the area in the technology and life sciences fields by helping companies grow faster.

EDUCATION

Education and addressing the increasing cross pollination of technology and life science is at the core of everything we do. Our goal is to develop and host industry-specific events that educate our members about issues they care about and that affect their bottom line. All of our forums, roundtables and tracks attract respected industry leaders who care enough to take the time to share their stories and offer advice.

In an effort to fill the workforce pipeline with students who are prepared to meet the challenges of STEM careers, we support the missions and activities of the MdBio Foundation and the Maryland Tech Council Foundation. Each of these organizations generates and disseminates STEM-related programs and educational materials to develop the next generation of skilled workers for the region's advanced technology community.

COST SAVINGS PROGRAM

Maryland Tech Council membership comes with a comprehensive benefits package that includes our popular Cost Savings Program. We partner with local and international companies to offer you big discounts on products and services like office supplies, express mail, lab supplies, insurance, and more. The money you save with our Cost Savings Program provides you with an excellent ROI to offset the cost of membership. We help you lower your costs and increase your margins with discounts on items you use everyday.
